

ROLLcut-s

The new world of reject roll handling

For Rollcut-s is typical:

- Small space demand, height 900 mm + roll diameter
- It's possible to handle several rolls at the same time even with different diameter
- Cores can be recycled
- Mounting with turntable or transfer car makes roll loading and core handling possible from different directions
- Rollcut-s can be fully automated

Controlled roll handling

By means of Rolleri covers the roll loading is safe and flexible.

Exact pulper loading

Rollcut-s works with slicing -method, which makes controlled pulper feeding easy.

Rollcut-s was released at Pulpaper 2007.
