

ROLLcut
Rollcut Splitters

Efficient and secure roll handling

Using Rolleri covers the operation is more convenient compared to belt conveyor application. By means of covers the splitted roll can be forwarded controlled to pulp process. Free enlargement of splitted roll reduces the cutting force.

Rolleri application: Rollcut waste roll splitter

Loading the roll from floor.

Roll adjustment to cutting position by means of covers.

Roll cutting.

Knife-acting cutting method reduces needed power,

and makes possible to cut easily even tissue paper rolls. The blade inclination angle can be adjusted to most efficient position.

Safe operation

The whole working sequence is protected against unattended approach. No access to blade working area.

The blade is protected in its rest position.
